Hi Gary,

There does not appear to be any chemical analyses on this sample. This report does not indicate what methods were used. It could be similar to a hazcat by using screening techniques.

Kristie:

See attached. Is this just a hazcat?

Good Afternoon Officer Dicker,

Attached is the unknown sample results for the sample that was taken at 4624 Kingsbury.

Chemical Composition:

Water/Aliphatic oil (~10%)

Trace Amount of: Biodiesel

(Tetradecane/Pentadecane/Hexadecane/Heptadecane/Octadecane/Fatty acids methyl ester)

This is a bi-layered liquid with a neutral pH (~7.1).

I will start contacting disposal facilities today to see if any additional analysis will be required for profiling unless I hear anything different from you.

Thank you,

Patricia Miller
